

Research Data Policy of the University of Siegen

Adopted by the Rectorate of the University of Siegen on March 30, 2017

The University of Siegen emphasizes the principle of individual responsibility for research and teaching among its researchers, even in the digital age. Accordingly, project leaders and independent researchers are responsible for adhering to good scientific practice in handling digital and non-digital research data, as well as for its long-term availability and reusability. They manage research data in accordance with discipline-specific standards, taking into account ethical, data protection, copyright, patent, and confidentiality concerns.

The University of Siegen provides them with special support by...

- the conditions for success for comprehensive, sustainable and eligible research data management creates;
- from the planning and application phase to subsequent use, service and consulting services via a supported by the Center for Information and Media Technology (ZIMT) and the University Library (UB) offers a joint service and consulting center for e-science infrastructures;
- reduce the administrative burden for scientists through appropriate organizational measures reduced scientific, technical and financial measures;
- an institutional and long-term archivable research data repository for storage, to Evidence and reuse in accordance with the criteria defined by the scientists establishes access rights;
- Establishes, maintains, and manages contacts with subject-specific repositories and central research data infrastructures mediates;
- in the event of publication, provides options for making suitable research data accessible;
- In the case of publication in accordance with the Open Access Policy¹, the use of suitable open access advises on content and open-source licenses, so that one's own reuse of research results remains secure;
- Provides patent law advice in the event that protectable results are created;
- Cooperations with other scientific partners in the field of research data management addresses and supports.
